I support the Hong Kong government to ban completely all the ivory trades, increase the animal trade penalties and wildlife trade to extremes, I do also oppose the government paying the Hong Kong ivory traders for their ivory stocks.

We only have this planet and one chance to live. Animals are making our planet as beautiful and healthy as it is. I am convinced that your government is advanced enough to recognize the value of all the living creature we have to protect to also save our lives, the animal lives and this planet.

Best regards
