Save the Elephants

Dear LEGCO

I support Hong Kong government's ivory ban.

We must look after the elephants. One day all the elephants will be gone ,because people around the world kill them and I like elephants .

Sometimes they are nice to people, but not when you attack them!

Some of the people will put the ivory in their home and they think that ivory looks nice, No! We can't just kill them because people think ivory looks good, so I want the government to ban ivory.

If they kill elephants they should have to pay a lot of money and go to the jail for many years.

I do not think Hong Kong government should be paying compensation to the Hong Kong ivory traders because they kill innocent lives

Please save the elephants!
