Dear LEGCO Panel,

I definitely agree that Hong Kong should ban Ivory! Thousands of elephants are dying because of this situation . In a few years the elephants might become extinct !Think of all those poor elephants that are dying in pain for the greed humans for ivory :( !

I'm also writing to you, because I strongly believe that the government proposed increase in penalties for wildlife crime is important ! Not just elephants are being endangered, but also animals such as Tigers !!

I appreciate that LEGCO is trying to save and protect wildlife !

I'm also against the government for wanting to pay the ivory traders compensation, just because of the lost of their business !

What they were doing is WRONG and they deserve no money !
