

Hong Kong Ivory Ban

I live in the United Kingdom but grew up in Africa and I urge the members of the Legislative Council to refrain from supporting any action that compensates ivory traders because I fully support the Hong Kong Ivory Ban

I currently foster 10 elephant babies in Nairobi and if their families had not been poached for their Ivory, these majestic (and now endangered) creatures would not be traumatised and fighting to survive

The killing of elephants for their Ivory is such a despicable act and we as humans should not encourage this barbarism because Ivory should only be worn by elephants

Yours faithfully
Vivienne Geroe
