Dear Sir/Madam

A note from the UK

I and The Majority of people if asked, it would be fair to say support a Global ban on the sale of Ivory and do not support compensating Ivory traders. Please urge the HK legislative Council to refrain from any action that compensates Ivory traders. Bearing in mind the extreme and awe inspiring efforts made by many decent people who understand they live on a Planet , a carefully balanced eco system and who risk their lives to protect Elephants from the few mad people who sadly have zero regard for the importance of Life.

It is Fair to say that Globally we understand that a living breathing Elephant is a Majestic Intelligent Family oriented Empathy feeling mammel - as are humans.

Only the few and it is the few in %terms would ever want this shameful industry to profit from so much misery and committed Atrocities.

Kind regards

Mrs Yvonne Luscombe

Hampshire  
Uk.
