To the Honorable Tanya Chan,

As individuals who deeply appreciate the presence of elephants on this Earth, and who cannot imagine a world without them in generations to come, we want you to know that we fully support the Hong Kong proposed legislation to ban the import, re-export, and possession of pre-convention ivory for commercial purposes and for increased penalties for wildlife crimes. We also believe that there should be no compensation to ivory traders and urge you to reject any amendments to this end.

To protect elephants from the carnage which has been occurring, markets must be closed. We applaud you and the citizens of Hong Kong for what you are doing to help protect this magnificent species.

With best wishes,

Dr. David and Mrs. Justine Ross
