Dear Hong Kong Government and regarding institute,

We are a member of HKIS family and apparently received a message about a issue about Ivory Trade,

As a member of our society, and globe member we understand the impact of human activity towards nature on earth,

in diverse capacity. We have seen a big issues in the Paris Agreement recently to help our global to prevent a higher climate and cause global warming. That leads to denounce of the destruction the ecosystem. We are now facing diverse problems after Human improvement on quality life, However our self- centeredness of ourselves has influenced the other nature facing of their existence.

But not only the warming issues we need to protect our nature in various angles, we do advocate the banning of Ivory Trade, that requires hunters to poach Elephants, and commit an extremely brutal act against the other living creatures on the Earth, that we humans do not have the right to do so.

We strongly agree to banning Ivory Trade in Hong Kong and saving the elephants on Earth. And as a member of Hong Kong Society, we do ask Hong Kong to be leading our world to safety and making a better place to live.

Please save our nature so that we can inherit our Global Nature to our future generation.

Thanks for reading,

Best,

HKIS family member
