

LC Paper No. CB(2)601/16-17(02)

(This submission was prepared in Braille (English version only).  
Its transcript is appended below for reference.)

I don't think it necessary that print more obsseve warning pictures because it didn't really deter smokqs from the habit. Innstead the picture may mislead the public the also there symptoms are resulted from smoking.

In addition, the distribution of horrifying fimages may violate the principles of human rights.

The public health is a human right, but the personal enjoyment of cigar products is also a right entitle by the constitution. The concerns of health shouldn't override our civil rights.

We therefore urge the government that lift an officiers ban on smoking cigar, maintaining the balance between the public and us.

Smokerism
