

James Lam  
AS (Health)2  
Food and Health Bureau

Dear Mr. Lam ,  
Subject : Proposed Regulatory Framework for Medical Devices ,  
Meeting on 13 Feb 2017

I am Dr. FUNG Ho Wang , Foundation Secretary and Past Chairman of Association of Doctors in Aesthetic Medicine ( Hong Kong) Limited.  
Personally , I strongly support the above proposed regulatory framework for medical devices to protect public safety.

On-site supervision by medical practitioner for certain HIGH RISK medical devices is reasonable because :

1. to make the diagnosis
2. to differentiate between benign and malignant lesion
3. to detect contra-indication , medical condition or certain drug that may interact with the Laser machine
4. to know the anatomy to avoid damage to nerve or vessel
5. to detect complication
6. to manage complication
7. medical practitioner will face Medical Council if there is any misconduct
8. to pay compensation for any injury.

Yours sincerely ,  
DR FUNG Ho Wang  
Past Chairman  
Association of Doctors in Aesthetic Medicine (Hong Kong) Limited
