

**交通事務委員會**

**在 2018 年 1 月 19 日會議上通過有關  
"落實新一代路旁停車收費錶系統"的議案**

鑑於政府即將推行新一代停車收費錶系統，本會建議政府：

1. 公開招標選取「結算服務營辦商」時，以爭取更多繳費系統或工具為目標，以及不應以收取交易費用低者為優先，希望能吸引更多投標者入場；及
2. 與警方研究安裝 CCTV，監察逾時泊位的車輛並影下車牌用以抄牌，提升阻嚇性且節省警力，從而增加泊車位的流轉性。

**Panel on Transport**

**Motion on "Implementation of a new generation of  
on-street parking meter system"  
passed at the meeting on 19 January 2018**

As the Government will soon introduce a new generation of parking meter system, this Panel proposes to the Government that:

1. it should aim at seeking more payment systems or means when selecting the "clearing service contractor" through open tender and should not give preference to bids charging low transaction fees, with a view to attracting more prospective bidders; and
2. it should explore with the Police the installation of closed-circuit televisions ("CCTVs") to monitor vehicles with parking time expired and to take photographs of their licence plates for issuing fixed penalty tickets so as to enhance the deterrence and save police manpower, thereby increasing the turnover of parking spaces.
