**Subject:** my 100% support for upcoming High Speed Train in Hong Kong

---

Dear Speaker of LEGCO,

I am a hk citizen spending my second half of my life in Australia. The hk High Speed Train no doubt is the envy of many countries overseas. Only economically strong government can proceed with this scale of infrastructure development which secures and strengthens the economical future over long term. Everyone will benefit from it be it personal or business level. I guess most people in overseas countries want it as they know the benefit, but when it comes to the question of who is going to pay for it, there is always no answer. Congratulation to hk government and its citizens as the system is ready to go now , as a member of the public, I call for the LEGCO members and general public to support the passing of all legal requirements to allow the running of the High Speed Train ASAP.

Regards

LW
