

Council

Chair ^{may} Lady, the Hon Legislative Members, Officials & Members of General Public.

Good afternoon!

As part from the article published last year, I was directed by the members of our association & institution to report the opinion of our majority, subsequent to several working group discussion concerning the co location arrangement for services at Old W.

We are positive to the arrangement, which is synchronized to the view of Mr K S Lee yesterday. As well, Mr C. Lam, CE, expressed the engineering projects should be done safely & with quality yesterday. She showed her concern for the substantial increase of cost.

From the engineering pt. of view, the cost of idling for machinery/equipment & manpower was is significant. As well, the safety & quality of the projects would likely be jeopardized. For the 'long term' SD of HK, the decision has to be quick/timely.

We are spending the tax payers' money & our money! Please treasure it!
As far as the legal aspect is concerned, it seems that the Dept. of Justice is handling
