Submission on The Joint-checkpoint in West Kowloon Railway Station

The Federation of Hong Kong Hotel Owners strongly supports the implementation of the joint-checkpoint in Hong Kong's Express Rail Terminal.

The Express Rail with over 28,000 km in China will provide convenient and efficient connectivity for people on both side of the border who are travelling for business or leisure to Hong Kong from the Mainland and vice versa.

The similar joint-border control system has been working well for years in Shenzhen Bay Port, which is on the mainland territory and has been leased to the Hong Kong government. On the other hand, there are already international precedents for similar joint checkpoint arrangements, such as ones between Britain and France and between the United States and Canada. We believe the joint-checkpoint in the railway station would have great success by having a good examples beforehand.
