1. To achieve a sustainable development of the Testing and Certification industry, we may consider to:
 - recognize the importance of the integrity and professional knowledge of practitioners
 - enhance the professionalism of practitioners through professional registration (e.g. Hong Kong Institution of Engineers 香港工程師學會, ...)

2. To support professional registration for practitioners in the Testing and Certification industry, an update on manpower development is shown below:
 - Four-year degree programmes for secondary school graduates (e.g. Open University, Baptist University, Vocational Training Council THEi, ...)
 - Top-up degree programmes for Associate Degree / Higher Diploma graduates (e.g. Open University, Vocational Training Council THEi, ...)
 - Associate Degree / Higher Diploma programmes for secondary school graduates (e.g. Open University, Baptist University CIE, Vocational Training Council, ...)
 - Professional short courses for practitioners (e.g. Hong Kong Association for Testing, Inspection and Certification 香港測檢認證協會, Vocational Training Council, ...)
 - Recognition of Prior Learning (RPL) mechanism 過往資歷認可機制 from Qualifications Framework 資歷架構 for practitioners
