

To Whom It May Concern,  
1 Sep., 2018.

Dear Sir/Madam,

Agriculture is important for the survival of Hong Kong citizens. It provides over 50% of livestock and fresh vegetables to the community. It provides leisure farms which are accessible and of low cost for local families. The annual agriculture and fisheries carnival event attracts over 60,000 visitors as a social and healthy activity in Hong Kong. The Government has promised to preserve the agriculture sector in providing sustainable agriculture fund and foci of agriculture areas. Thus agriculture land should be preserved rather than change in land use.

Yours sincerely

Sustainable Green Limited.
