

Panel on Environmental Affairs

**Follow-up actions arising from the policy briefing cum meeting on
30 October 2017**

**Agenda item IV — Implementation arrangements for
municipal solid waste charging**

The Administration is requested to provide information on:

- (a) the existing charges per tonne of waste disposed of at different refuse transfer stations ("RTSs") by private waste collectors, and the reasons for setting the charges at different levels;
- (b) whether the Administration would consider aligning the gate fee per tonne of waste at the same level for all RTSs and landfills after the implementation of municipal solid waste charging, and the reason if the Administration would not consider so; and
- (c) details of the Administration's enforcement actions against illegal fly-tipping, including in particular the number of fixed penalty tickets issued to offenders intercepted in the vicinity of Braemar Hill, a fly-tipping black spot, in the past few years.
