17 May 2018

Dear Ms. Shek,

**Follow-up actions arising from the Panel on Environmental Affairs**

During the discussion on tightening the emission standards of non-road vehicles under the Air Pollution Control (non-road Mobile Machinery) (Emission) Regulation at the meeting on 26 March 2018, Members have requested the Administration to provide supplementary information. Please find our response at **Annex** for your reference.

If you have any queries, please contact me at 2594 6309.

Yours faithfully,

(Dave Ho)

for Director of Environmental Protection

Encl.

**Annex**

**Panel on Environmental Affairs**

**Follow-up action arising from the meeting on 26 March 2018**

Members requested the Administration to provide a breakdown of the emissions of nitrogen oxides and respirable suspended particulates from non-road vehicles and regulated machines respectively in Hong Kong in 2015. Our reply is as follows:

2. Non-road mobile machinery (NRMM) includes non-road vehicles and regulated machines. The Environmental Protection Department estimates the emissions of air pollutants from NRMM based on the total fuel consumption provided by the Census and Statistics Department and the relevant trade. Many NRMMs are operated in construction sites in which only the total fuel consumption of NRMMs can be provided without any further breakdown into non-road vehicles and regulated machines. As such, we are unable to provide a breakdown of the emissions of nitrogen oxides and respirable suspended particulates for non-road vehicles and regulated machines.

Environment Bureau / Environmental Protection Department  
May 2018

Yours faithfully,

(Dave Ho)

for Director of Environmental Protection
