Clear the Air says:

The Government responses in Legco today were totally apathetic

We need more species protected or face extinction

We need tougher mandatory legislation and punishments as preventative measures

We need this now

Not at Govt speed

Since the *Aquilaria sinensis* poachers work in the dark how many drones does Govt have with thermal imaging cameras?

The Govt does not protect these species on leased land areas like golf courses which are effectively , nature reserves.

We need political will – make these buffoons do their jobs properly and proactively

HKG SSSI sites of special scientific interest have ONE AFCD staff to monitor the whole of Hong Kong – say no more!
