致全體立法會議員：

主題：支持「全面禁止電子煙及其他新煙草產品」並訂立全面禁煙的時間表

一些吸煙數十年的老年吸煙者非常不情願，現在害怕戒菸。他們為什麼會這樣？這是因為過去人們沒有被教導吸煙的後果。並且禁止兒童使用香煙。如果當時完全禁止吸煙，那些人的吸煙情況必須與現在不同。

新型煙草產品讓吸煙者同時使用傳統煙和新型煙草，而不是幫助他們徹底戒菸！電子煙和傳統煙一樣增加心臟病病發率，同時吸食傳統煙和電子煙的人士心臟病病發率就遠遠高於非吸煙人士。

主題: 支持「全面禁止電子煙及其他新煙草產品」並訂立全面禁煙的時間表

E-cigarettes are popular among teens and young adults, and yet nicotine in e-cigs can harm their brain development, which continues to age 25, not 18. The government should legislate a total ban on e-cigarettes and other new tobacco products as soon as possible to protect the Hong Kong' s younger generations.

Re: Supporting the "Total ban on e-cigarettes and other new tobacco products" and setting a timetable for a total ban

To all Legislative Council members :

Tobacco companies say that e-cigarettes help people quit smoking , which is less harmful than traditional cigarettes , so many people use it . However, until now, there is no evidence that the health risks of e-cigarettes are lower than those of traditional cigarettes . The government should legislate as soon as possible to completely ban e-cigarettes and other new tobacco products, including heating non-combustible tobacco products.

Dear all members of the Legislative Council,

Some people profess e-cigarettes and other new tobacco products may help smokers kick a tobacco habit, yet many research have already proved that this is not the case. In fact, the current smoking cessation services and medication provided by the government and NGOs are proved to be effective in helping smokers to quit smoking. Thus, to safeguard the public against the potential harm risks of e-cigarettes, I strongly urge for a total ban on E-cigarettes and other new tobacco products, and a timeline for total ban of smoking in Hong Kong.

Dear all members of the Legislative Council,

Nowadays many teenagers are exposed to e-cigarettes and other new tobacco products, wrongly believing these products will do no harm to their health. Merely regulating these products is actually no different from legalizing them and it will literally wind up in more uses. Therefore, I sincerely urge the government could enact a total ban on e-cigarettes and other new tobacco products for the sake of teenagers' health.

Please remember that the past arbitrary attitude of the Governments around the world towards conventional cigarette brings serious health problems of general public as well as the huge burden of public health services. More support of the total ban, less risks of repeated catastrophes will be happen.

Dear all members of the Legislative Council,

The tobacco industry has been promoting e-cigarettes and “heat-not-burn” devices like iQOS, as ways to decrease or even quit smoking. Yet the World Health Organization already claimed that it is not the case. A growing body of research have also shown that e-cigarettes does contain different harmful substances not found in traditional cigarettes, thus they are in no way less harmful than traditional ones. Therefore, to safeguard the health of the public, I strongly urge for a total ban on all these new tobacco products.

Dear Legislative Council Members,

Re: Support Total Ban on E-cigarette and other New Forms of Tobacco Products and Request for
Timeline on Tobacco Endgame

There are various tailor-made smoking cessation products in Hong Kong at present. At the same time, the impacts of e-cigarette, heat-not-burn tobacco products and other new forms of tobacco products on the quitting have not yet supported by clinical trials. The Government, members of the public and the Legislative Council Members should take actions in support of speeding up the promotion of existing smoking cessation services and products instead of putting individual health at risk.

Dear all members of the Legislative Council,

I am writing to support a total ban on E-cigarettes and other new tobacco products, and urge for a timeline to ban smoking. E-cigarettes and other new tobacco products are advertised as trendy products attracting particularly the teenagers to try. E-cigarettes end up becoming a gateway to tobacco smoking among youngers. To protect the health of the young generation and to actualize the goal of smoke-free Hong Kong, the government should thus enact a total ban on these products.

Re: Supporting the "Total ban on e-cigarettes and other new tobacco products" and setting a timetable for a total ban

To all Legislative Council members :

8.7% of secondary school students in Hong Kong used electronic cigarettes, and the number continues to rise . If the Government wants to maintain Hong Kong's competitiveness, it must first safeguard the health of the future community. It should legislate as soon as possible to completely ban e-cigarettes and other new tobacco products, including heating non-combustible tobacco products.

To all Legislative Council members :

Most e-cigarettes contain nicotine. Some famous brands have high nicotine content. The consumption of 0.5 ml of smoke oil is equivalent to smoking a whole package of traditional cigarettes. Medical research in Hong Kong and around the world has proved that non-smokers will have greater desire to smoke traditional cigarettes once they start using e-cigarettes. This is the portal effect of e-cigarettes .

致立法會,

吸食電子煙不但會增加患心血管疾病的風險，更會增加呼吸道症狀。為保障公眾健康，請府增加電子煙研究基金及教育市民有關電子煙對健康的風險。

姓名: 黎倩怡

學生/家長/在職人士/其他

致立法會,

不少市民不了解電子煙對健康所產生的負面影響，誤以為電子煙比傳統煙較為健康。但事實是電子煙的氣霧並非如產品推銷時所聲稱的只是“水蒸氣”而已，還驗出含有甲醛(一種致癌物質)和重金屬。為免市民被煙草業建造業所製造的宣傳所誤導，政府應該立法全面禁止電子煙銷售，以保障公眾健康。

姓名: Michelle

學生/家長/在職人士/其他

致立法會,

不少年青人因為使用電子煙而開始接觸煙草產品。但因電子煙含有尼古丁，青少年吸用電子煙成癮的情況更加嚴重。
