Dear Legislative Council Secretariat,

Hong Kong is short of land and reclamation has been proved in last 100 years to be the quickest way to generate and obtain land within the boundary of Hong Kong.

According to the track record and experience in reclamation works, Hong Kong is capable to create land within a short period of time (say 3 to 5 years).

Creation of land is so critical at this moment as the properties are too expensive that it is hopeless for our young generation to buy a flat. They are all complaining and act very negatively in the society.

I support reclamation to form artificial island in the central waters and there is great advantage in choosing that location:

1. it is close to Hong Kong Island, just 10 Km away;
2. it will generate the less environmental impact to the surrounding;
3. it's areas give good potential for another satellite city like TKO.

Regards,

Ir. Cheng Kin Wah
