

Panel on Environmental Affairs

Follow-up actions arising from the meeting on 28 January 2019

Agenda item III — Promoting the use of electric vehicles

The Administration was requested to provide information on:

- (a) examples of the green transport technologies for commercial vehicles that were tested out under the Pilot Green Transport Fund and found to be suitable for adoption locally;
- (b) of the 4 788 old private cars ("PCs") that met the requirements of the "One-for-One Replacement" Scheme and were de-registered after being scrapped from February to December 2018, how many owners concerned have bought a new petrol/diesel PC to replace the old one;
- (c) whether the Administration has studied the reasons why the PC owners referred to in (b) above have not chosen electric PCs for replacing their old PCs despite the first registration tax concession offered during the period, and if yes, the findings; and
- (d) a list of issues considered by the Steering Committee on the Promotion of Electric Vehicles since its establishment, and a summary of its deliberations and conclusions (if any) on those issues.
