Subject: New market in Tung Chung

History: ↪ This message has been forwarded.

Dear Sirs,

I represent a number of Tung Chung residents to strongly object to the proposal of building a new market at the traffic interchange area (zone 6) in Tung Chung. By experience of other market places, the surroundings of a market is usually rather dirty and messy, as there is often loading and unloading of food such as fish, meat, vegetables etc. The new market is said to be a 32-storey building, which will be an eye sore to the other buildings around. The existing open area and air ventilation will also be undermined. Besides, since it is so close to the MTR station, it will be a bad impression to the tourists frequently moving in and out.

We welcome a new market for our living, but not at this proposed location! We thank you for your attention to this letter of objection.

A group of Tung Chung residents.
