

Dear Chairman and Excos,

I am a registered nurse as well as a clinical psychologist. I write to support the consultation documents of Accredited Register (AR) scheme for clinical psychologists. A registration system is important to uphold the standard of psychological service in Hong Kong, and to protect the public from receiving below standard.

While I was receiving training in nursing schools, I had to receive supervision from nurse tutors and also graduated registered nurses in hospital wards. This is the best way to help student nurses to put what they learned in nursing schools into practice. This should also be the basic training format for clinical psychologists in training. Therefore, I support the latest consultation documents of the AR scheme for CPs.

Thank you,
POON Wai Ling Maggie
