

Submission from Ms LEE Sau-wai

As a social worker, I would like to express my support to establish Accredited Register Scheme for clinical psychologists proposed by HKPS-DCP.

I understand that the scheme is put under third round of consultation and the controversy involved. I support a robust regime in place to ensure the quality of clinical psychologists and to ensure protection of the public. I truly appreciate the effort of HKPS-DCP in trying to balance this need and to ensure inclusiveness to those already practicing in the field.

At present, there is a huge demand for psychological service. For the interest of the general public, I hope that the scheme could be implemented soonest possible without further delay.
