

**For discussion  
on 16 November 2018**

**Legislative Council Panel on Transport  
“Universal Accessibility” Programme**

**PURPOSE**

This paper reports the latest progress of the “Universal Accessibility” (UA) Programme and briefs Members on the work in 2019-20 under the Programme.

**BACKGROUND**

2. The Government has been installing barrier-free access facilities at public walkways<sup>1</sup>. In response to public requests, the Government launched in August 2012 a new policy to expand the programme to retrofit barrier-free access facilities at public walkways, striving to create a “universally accessible” environment in the community to facilitate the access to public walkways by the public. Under this policy –

- (a) when considering retrofitting of barrier-free access facilities to existing or newly constructed public walkways, the Government will treat lifts and ramps equally (unless the site conditions dictate one form over the other). This is a change from the past practice which gave priority to ramps; and
- (b) as long as site conditions permit, the Government will consider retrofitting lifts at walkways where there is already a standard ramp installed. After a lift has been retrofitted, we will evaluate whether to keep the ramp or demolish it for more spacious pavement or making way for roadside greening.

3. In response to the aspirations of the public and Members for inclusion of other walkways in the UA Programme, and in consideration of the principle of prudent use of public funds, the Government announced in the 2016 Policy Address that starting from the fourth quarter of that year, we would invite the District Councils (DCs) to further select not more than three existing walkways

<sup>1</sup> Public walkways refer to public footbridges, elevated walkways and subways maintained by the Highways Department.

in each district for implementation under the second phase of the UA Programme. The walkways eligible for selection by the DCs will no longer be confined to public walkways maintained by the Highways Department (HyD), provided that the following criteria are met and no land resumption will be involved to ensure the proper use of public funds:

- (a) the walkways span across public roads maintained by the HyD;
- (b) the walkways are open for public access from public roads at all times;
- (c) the walkways are not privately owned; and
- (d) the parties responsible for the management and maintenance of the walkways agree to such lift retrofitting proposals and are willing to cooperate with the Government during the implementation of the retrofitting works for the said lifts as well as the subsequent management and maintenance works of the lifts.

## **CURRENT PROGRESS**

### Original Programme

4. Prior to the announcement of the new policy in August 2012, the Transport and Housing Bureau had been taking forward the Original Programme of retrofitting barrier-free access facilities to public walkways in response to the recommendation of the Equal Opportunities Commission. The HyD obtained approval for Item No. 6167TB from the Finance Committee in July 2011<sup>2</sup> for commencing the retrofitting works of barrier-free access facilities for 10 items and the design for other items of barrier-free access facilities under the Original Programme; the construction and associated costs related to the latter are funded by block allocation Subhead 6101TX – “Universal Accessibility Programme” which was created in January 2013. The Original Programme is currently being implemented as scheduled with progress as follows –

- (a) the retrofitting works for all 10 items under Item No. 6167TB have been completed; and
- (b) for the 135 items implemented under block allocation Subhead 6101TX – “Universal Accessibility Programme”, 70 have been completed and 56 are under construction. For the remaining nine items, due to various factors such as longer time required for handling different public

---

<sup>2</sup> This refers to Item No. 6167TB – Provision of barrier-free access facilities at public footbridges, elevated walkways and subways – design works and phase 1 construction works.

opinions, the need to co-ordinate with other works or development projects, and other design and construction problems, the HyD is still formulating their design schemes and implementation programmes. The HyD will commence the retrofitting works for these items as soon as possible upon proper resolution of the concerned matters.

5. In summary, retrofitting works for the 145 items under the Original Programme (the relevant information is listed at **Annex I**) are in general being implemented smoothly, with about 94% of the items either completed or in the construction stage.

### Expanded Programme

6. When the new policy was announced in August 2012, we invited members of the public to propose other locations at public walkways where they considered lift retrofitting necessary. Response from the public was overwhelming. Between August and October 2012, there were suggestions for lift retrofitting at about 250 public walkways. In the first half of 2013, we invited the 18 DCs to prioritise the new items proposed by the public by which each of the DCs had selected three public walkways for priority implementation (referred to as the “Expanded Programme”).

7. The 57 priority items<sup>3</sup> under the Expanded Programme are being implemented smoothly, of which 14 have been completed, 41 are under construction, and the design schemes and implementation programmes of the remaining two items are to be formulated in due course given that there are issues related to planning, design and local consultation to be settled.

8. Overall speaking, the 57 priority items under the Expanded Programme (the relevant information is listed at **Annex II**) are in general being implemented smoothly with about 96% of the items either completed or in the construction stage. As regards the remaining two priority items, the HyD will commence the retrofitting works for these items as soon as possible upon proper resolution of the relevant matters.

### The Second Phase

9. Following the announcement of the initiative to further expand the ambit of the UA Programme in the 2016 Policy Address, from December 2016 to September 2017, we again invited the 18 DCs to each further select not more than

---

<sup>3</sup> Each DC selected three public walkways (locations) for priority implementation, viz. a total of 54 public walkways (locations). Among them, some public walkways (locations) involve more than one structure number (item), resulting in a total of 57 priority items.

three existing walkways proposed by the public under the expanded ambit of the programme for implementation under the next phase of the UA Programme (referred to as the “Second Phase” of the UA Programme).

10. We are now carrying out the investigation or design work for the 47 items<sup>4</sup> selected under the Second Phase (the relevant information is listed at **Annex III**). So far, we have briefed the DCs concerned on the findings of the investigation and the preliminary schemes of 28 items<sup>5</sup>, and have been progressively commencing the detailed design work for those schemes confirmed to be technically feasible and supported by the DCs. The construction works of the items under the Second Phase are anticipated to commence progressively starting from 2019.

### The Third Phase and Review of the Programme Ambit

11. As the UA Programme has been widely supported by the community, it was announced in the 2018 Policy Address that the Government would commence a feasibility study in the first half of 2019 on lift retrofitting proposals for the remaining some 120 walkways under the current ambit of the programme across various districts (the relevant information is listed at **Annex IV**)<sup>6</sup> with a view to taking forward the feasible items expeditiously so as to benefit the elderly and people in need (referred to as the “Third Phase” of the UA Programme).

12. The HyD has been undertaking the relevant preparation work with a view to engaging consultants in the first half of 2019 to carry out investigation for the 132 lift retrofitting items under the Third Phase so as to ascertain their feasibility. Upon completion of the investigation for individual items, the HyD will brief the DCs concerned on the findings of the investigation and the preliminary schemes

---

<sup>4</sup> The DCs have totally selected 45 public walkways (locations). Amongst them, two of the walkways (locations) involve two and three structure numbers (items) respectively, resulting in a total of 48 items. However, the investigation on lift retrofitting for the walkway across Lung Poon Street near Fung Tak Road (composed of two footbridges with Structure Nos. KF92 and KF92A) confirmed that retrofitting of one lift at the above location connecting to Footbridge KF92A could at the same time provide barrier-free access facilities for the adjoining Footbridge KF92. The HyD has reported the situation to the DC concerned. Therefore, investigation or design work for a total of 47 items are being carried out under the Second Phase.

<sup>5</sup> Including two items which were confirmed to be technically infeasible after investigation. Owing to the inadequate space on site for the construction of the concerned facilities, there is no feasible lift retrofitting scheme for Footbridge HF6 across Caine Road near Peel Street and Footbridge HF175 across Ap Lei Chau Bridge Road near Ap Lei Chau Drive. The HyD has reported the above investigation findings to the respective DCs.

<sup>6</sup> The lift retrofitting proposals at the remaining 128 walkways (locations) eligible under the current ambit of the programme are those public suggestions received since the Expanded Programme, deducting those selected for implementation under the Expanded Programme and the Second Phase. Amongst them, four of the walkways (locations) involve two structure numbers (items), resulting in a total of 132 items.

of the items. The detailed design work for those schemes confirmed to be technically feasible and supported by the respective DCs will commence afterwards. The construction works of the Third Phase are anticipated to commence progressively starting from 2021.

13. Furthermore, the Government will also conduct a review in 2019 to explore whether there is any scope for further expansion of the UA programme. We will report to the Panel upon completion of the relevant work.

## **FUNDING APPLICATION**

14. We estimate that in the Financial Year 2019-20, the above-mentioned works require a budget of **\$650 million** to fund the relevant costs in the concerned year. Subject to obtaining the necessary funding allocation, the costs will be charged to the block allocation Subhead 6101TX – “Universal Accessibility Programme” under Capital Works Reserve Fund Head 706 – “Highways”.

## **ADVICE SOUGHT**

15. Members are welcomed to comment on the UA Programme.

**Transport and Housing Bureau
