BACKGROUND

Salaries Tax and PA

10. Salaries tax is chargeable mainly on income from employment arising in or derived in Hong Kong. There are currently five tax bands, each \$50,000 apart. The marginal tax rates are 2%, 6%, 10%, 14% and 17% of the net chargeable income (i.e. assessable income after deducting eligible allowances and deductions), and the tax payable is subject to a ceiling capped at 15% of the assessable income after deductions. In 2018-19, the revenue from salaries tax was \$60.1 billion.

11. PA may provide relief for taxpayers who have income that is chargeable to profits tax and/or property tax apart from their employment. The eligible allowances and deductions as well as the progressive rates applicable to salaries tax will apply. In 2018-19, the revenue from PA was \$6 billion.

12. In YA 2018/19, about 1.91 million taxpayers are subject to salaries tax and tax under PA while the working population was about 3.94 million as at 31 December 2019.

Profits Tax

13. The two-tiered profits tax rates regime has been implemented since YA 2018/19. The profits tax rates for the first \$2 million assessable profits is 8.25% for corporations and 7.5% for unincorporated businesses. The rate for assessable profits exceeding \$2 million is 16.5% for corporations and 15% for unincorporated businesses. In 2018-19, the revenue from profits tax was \$166.6 billion.

14. In YA 2018/19, about 145 000 corporations and unincorporated businesses had assessable profits while there were 1.27 million corporations and 263 000 unincorporated businesses in Hong Kong as at 31 December 2019.
