

**SUBMISSIONS ON INNOVATION AND TECHNOLOGY DEVELOPMENT  
AND  
THE RE-INDUSTRIALIZATION POLICY IN HONG KONG**

Hong Kong Information Technology Federation is of the opinion in respect of the innovation and technology development and the re-industrialization policy in Hong Kong as follows.

1. Government needs holistic approach for digital skills development and employability program especially to support unemployed workers affected by COVID-19.
2. Accelerate digital transformation for both public sector and enterprises by adopting Cloud services for all workloads.
3. Promote open data to allow organizations of all sizes to realize the benefits of data and the new technologies it powers.
4. Need for public regulation and corporate responsibility for AI technology (e.g. face recognition) adoption.
