Mr Daniel SIN,
Clerk to Panel,
Panel on Information Technology and Broadcasting,
Legislative Council Complex,
1 Legislative Council Road,
Central, Hong Kong

Dear Mr Sin,

**Panel on Information Technology and Broadcasting
Update on Smart City Development**

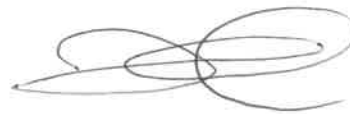

At its meeting on 8 June 2020, members of the Panel on Information Technology and Broadcasting requested the Administration to provide supplementary information on –

- (a) a list of government departments that would make their data available for sharing through the Common Spatial Data Infrastructure (CSDI) and how the Administration plans to promote CSDI;
- (b) the development costs and the recurrent maintenance expenses of “HKeMobility” mobile application; and

- (c) the details of parking vacancy information of public car parks provided by government departments and operators of non-government, number of non-government car parks of which their operators did not open up their parking vacancy information, and when the Administration expects parking vacancy information of all car parks to be made available.

Having consulted the Development Bureau and the Transport and Housing Bureau, we set out our response at **Annexes A and B.**

Yours sincerely,

A handwritten signature in black ink, consisting of several overlapping loops and a long horizontal stroke at the bottom.

(Felix CHAN)
for Secretary for Innovation and Technology

**List of government departments
that would make their data available for
sharing through CSDI**

As at April 2020, the Development Bureau (DEVB) has identified a tentative list of about 240 spatial datasets to be opened up on the CSDI portal by end 2022. Details of these datasets, data owners (comprising government departments), categories of data and general description (as at April 2020) are summarised at **Appendix I**. DEVB will continue to identify more different types of spatial data to enrich the list of datasets.

How the Administration plans to promote CSDI

DEVB is committed to promoting the CSDI through implementing a number of engagement activities to help the wider community discover geospatial datasets and better appreciate the value and importance of spatial data in the delivery of public services, productivity enhancement, development of innovative and smart mobile applications for improving quality of life, etc.

Since early 2019 after earmarking dedicated funding for the implementation of CSDI in the 2019-20 Budget, DEVB has consulted different parties including the Legislative Council Panel on Development, the Land and Development Advisory Committee, the Committee on Innovation, Technology and Re-industrialisation, District Councils, etc. to publicise the CSDI initiatives. We have also designed a CSDI logo to complement our publicity efforts in promoting greater use of spatial data in the community. The logo symbolises the major objectives of opening up and sharing of spatial data as digital infrastructures to underpin the smart city development in Hong Kong.

DEVB is setting up a Common Spatial Data Advisory Committee with spatial data and technology experts as non-official members to advise on how best to develop the CSDI that can suit the

needs of society and economy. The private sector include expertise from (i) development and construction industry, (ii) geo-spatial and information technology related group, (iii) professional bodies, (iv) academics, (v) social / community services, (vi) utility companies, (vii) transport operators, and (viii) telecommunication services providers.

No better publicity can be generated than a successful real-life example of application of spatial data in promoting the well-being of the community. By providing latest integrated pandemic information on-line, the Convid-19 Dashboard launched in February this year has been widely welcomed by the community attracting more than 25 million hit rates as at early July 2020. Looking ahead, in 2020-21, we will continue to promote wider use of spatial data by launching the CSDI Website, rolling out a ‘Call for CSDI initiatives of spatial data applications’ and establishment of Geospatial Lab with details as follows –

- (a) The CSDI Website will disseminate the latest news and activities related to CSDI development to arouse the public’s awareness of the use of spatial data as well as to encourage the private sector including geo-spatial and information technology people to provide suggestions on the development of CSDI.
- (b) The ‘Call for CSDI Initiatives’ will establish a wish list of applications on how to better use of spatial data through a series of engagement activities such as interviews, technical workshops and focus group meetings. Selected applications will be implemented by developing proof of concept solutions.
- (c) The Geospatial Lab will provide a platform for the Government to reach out to the wider community in particular the younger generation and start-ups including application developers through provision of properly fitted-out working space with access to high end computers with Geographic Information System software and cloud hosting services as well as various engagement activities

including mentoring and coaching services, training courses, seminars, workshops, visit, etc.

DEVB continues to promote the CSDI initiatives in support of smart city development by participating in various events such as Construction Innovation Expo, meeting different stakeholders such as professional bodies, start-ups, non-governmental organisations, geospatial technology partners, academics, etc., and organising a range of promotional activities including launching of spatial data, district-based spatial information dashboard, map API, GeoAddress, geotagging tool, 3D pedestrian network, indoor map and 3D mesh model etc., as well as launching a short video to promote CSDI and convening CSDI awards.

“HKeMobility” mobile app and parking vacancy information

(1) “HKeMobility” mobile app

The development cost of the Transport Department (TD)’s “HKeMobility” mobile app was about \$0.6 million. In 2020-21, the maintenance expenditure for the mobile application is estimated to be about \$0.8 million.

(2) Parking vacancy information

(a) Details of parking vacancy information of public car parks provided by government

As at end May 2020, the numbers of government and non-government public car parks with parking vacancy information disseminated through the “HKeMobility” app were as follows:

Government Public Car Parks*	Non-government Public Car Parks	Total
About 50	About 320 [#]	About 370

Notes:

* *Government public car parks mainly include car parks managed by government departments such as TD, Government Property Agency and Housing Department.*

About 30 of them were short-term tenancy (STT) car parks.)

(b) Number of non-government car parks of which their operators did not open up their parking vacancy information

As at end May 2020, about 1 630 non-government public car parks did not make available their parking vacancy information through

the “HKeMobility” app. About 160 of them were STT car parks.

(c) When the Administration expects parking vacancy information of all car parks to be made available

Since 2019, various government departments have taken steps to incorporate new requirements into their new contracts for car park management, asking car park operators to disseminate parking vacancy information via the “HKeMobility” app. With the gradual renewal of car park management contracts, we expect that the parking vacancy information of all government car parks could be fully disseminated in two to three years.

Regarding non-government public car parks, the Lands Department has since mid-2018 incorporated provisions into new STT agreements of fee-paying public car parks, mandating operators to provide parking vacancy information of their car parks to the Government. With the gradual replacement of old STT agreements by new ones containing the above-mentioned new provisions, TD expects that the parking vacancy information of STT car parks will be made available in a progressive manner.

TD has also endeavoured to liaise with operators and developers of other non-government public car parks and provides technical advice where necessary, with a view to encouraging them to provide parking vacancy information and fostering smart mobility.
