Subject: Charging on waste disposal

The proposition for charging individual companies/
businesses/homes for waste disposal should be mandatory in
hongkong
Especially on single use disposable products plastic
especially.

As excessive packaging on products at source is a mounting
problem

Educating people to find pride in using local products that
have less packaging and need less transport to reach the
consumer is the best way to a society fulfilling its needs
and creating employment within the community

The government on the other hand needs to subsidise better
potable water and sanitary conditions and charge disposal
waste at source for single use plastics
And every product that has a higher carbon foot print
Only local produce should be promoted

Hoping for a better managed waste system for our Hongkong

Ms Dsa
