Subject: Municipal waste scheme

Dear Sir/ Madam,

I am writing to voice my support for the municipal solid waste scheme.

Hong Kong needs a 21st century solution for the mountains of waste that it produces everyday. In fact, it has been growing by 15% every year with most of it going into landfills whilst plenty of its also ends up in the sea.

Our landfills are finite and we need to encourage a community wide recycling programme which incentivises the population to recycle.

Waste schemes implemented in Taiwan and South Korea successfully reduced waste output by 30% which is a wonderful achievement.

I hope that this bill can pass successfully.

Hope that you and your loved ones are keeping healthy and well.

Warmest regards,

Aiko
