

10.2.21

Dear Sir/Madam,

We are a volunteer organisation representing the dragon boat community in Hong Kong. Our aim is to actively encourage paddlers reduce the plastic they bring to the beach for training and events by using reusable bottles and bringing their own food to festivals.

We also work with festival organisers to enable them to go 'plastic free' with the use of water stations and raising awareness to paddlers not to bring plastic and Styrofoam before the event.

We are 60 teams, over 2,000 people who have decided to do our part to help Hong Kong's plastic problem.

We support the new waste scheme but have concerns that citizens will dump rubbish to avoid the charges. We understand there are potential fines to face should this happen, but, are concerned there will not be enough enforcement.

Sufficient recycling facilities and collection should be vastly increased. Education around recycling and the issues HK is facing is key to a successful outcome.

Thank you for your time.

Kind regards,

Green Dragons HK
