**Hon Holden CHOW's motion on
“Commencing a new phase in
Hong Kong's development of re-industrialization”**

Wording of the Motion

That the Government has been actively promoting re-industrialization in recent years by rolling out various infrastructure projects and funding schemes for the development of advanced manufacturing industry based on new technologies and smart production; in this connection, this Council urges the Government, on the existing basis, to formulate a categorical medium-to-long-term development strategy for Industry 4.0, such as fostering the ‘intelligentization’ of traditional industries and promoting smart production with the use of new and high technologies, and to further provide appropriate support measures, including the provision of industrial sites that can achieve clustering effect and assistance to Hong Kong's manufacturing industry for exploring more overseas markets (such as the Association of Southeast Asian Nations markets); at the same time, the Government should actively strive for collaboration with Shenzhen and other Mainland provinces and municipalities, in a bid to enhance the recognition of Hong Kong's development of manufacturing industry and expand its room for business.
