

**Panel on Economic Development**  
**List of follow-up action**  
(position as at 18 May 2021)

<b>Subject (Date of meeting)</b>	<b>Follow-up action required</b>	<b>Response from relevant parties</b>
1. Upgrading of facilities of the Hong Kong Wetland Park (26 April 2021)	The Administration was requested to provide information the usage rates of the venues for hire in the Hong Kong Wetland Park ("HKWP") from 2016 to 2018 and whether the Administration would consider converting the venues with low usage rates to other facilities under the proposed upgrading plan of HKWP so as to open up more space for visitors.	The Administration's response was issued to members vide LC Paper No. CB(4)976/20-21(01) on 11 May 2021.
2. Replacement of long-range light detection and ranging systems and procurement of wake turbulence detection equipment for the existing North and South runways of Hong Kong International Airport (26 April 2021)	While the serviceable life of a long-range light detection and ranging ("LIDAR") system was about 10 years, the two LIDAR systems currently in use at the existing North and South runways of Hong Kong International Airport would require replacement only after eight service years under the impact of sand and dust from the three-runway system construction sites. The Administration was requested to advise whether there was any case requiring early replacement of the LIDAR system under similar situation in overseas places.	The Administration's response was issued to members vide LC Paper No. CB(4)1000/20-21(01) on 17 May 2021.
