**Hon Martin LIAO's motion on
“Establishing sound industry and supply chains and related services and
developing Hong Kong into a multinational supply chain
management centre”**

Wording of the Motion

That with geopolitical changes and advancements in scientific technology, the global industry and supply chains are undergoing diversification as well as upgrading towards digitalization and smart development; and the goal, as proposed in the 2024-2025 Budget, is to develop Hong Kong into a multinational supply chain management centre; in this connection, this Council urges the Government to seize the opportunities brought by emerging markets and new industries to establish sound industry and supply chains, fully leverage Hong Kong's edge as an international city equipped with professional services, assist enterprises in ‘going global and attracting foreign investment’, and contribute to the upgrading and transformation of the industry and supply chains of our country and the world to help enhance their resilience and stability, thereby forging the supply chain into a chain of mutual benefits.
