**Hon Jimmy NG's motion on
“Accelerating the development of the Hong Kong Park in the Loop to
create new economic growth points”**

Wording of the Motion

That innovation and technology (‘I&T’) drives economic transformation and shapes tomorrow; the Government promulgated the Development Outline for the Hong Kong Park of the Hetao Shenzhen-Hong Kong Science and Technology Innovation Co-operation Zone, proposing four major development directions, namely to build a world-class industry-academia-research platform, to establish an internationally competitive research and development transformation and pilot production base for industries, to foster a hub for pooling global I&T resources, and to cultivate a testing ground for institutional and policy innovation; in this connection, this Council urges the Government to map out a comprehensive blueprint and introduce more support measures to assist industry development, so as to create new economic growth points for Hong Kong.
