**Hon Adrian HO's motion on
“Boosting the local consumption market to inject impetus into economic
development”**

Wording of the Motion

That, given the changes in the global economic landscape, Hong Kong's economic outlook faces uncertainties, posing a series of challenges to large, medium and small enterprises in industries such as retail and catering; in this connection, this Council urges the SAR Government to dovetail with the plan on special initiatives to boost consumption unveiled by our country by introducing a series of measures for stimulating local consumption to create a good consumption atmosphere, enhance consumer confidence, and encourage members of the public to unleash their consumption potential, thereby promoting growth in Hong Kong's domestic market and strengthening economic development impetus.
